

Unlocking the Future of the Horse-Cart:

Empowering Change

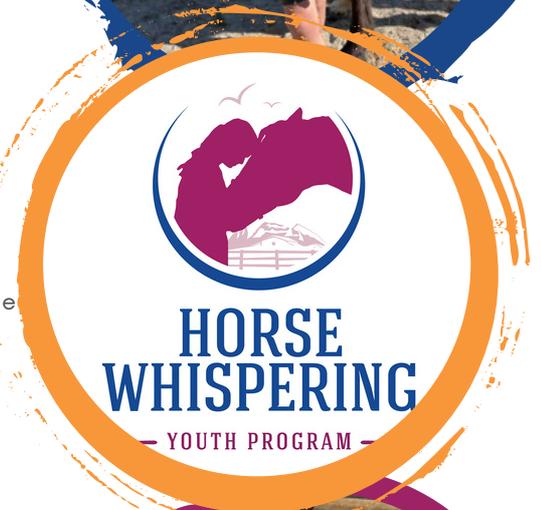

Unleash the Potential

Introducing the remarkable potential of early intervention and unwavering family support through the Horse Whispering Youth Program (HWYP). We are **devoted to igniting positive transformations** in the lives of young individuals and their families. Harnessing over a decade of collaboration with both state and private services, we proudly deliver innovative, cost-effective, and compassionate equine learning programs designed to make a lasting impact.

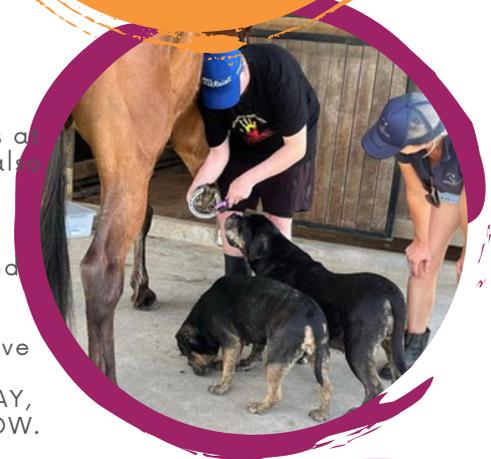

Embrace Inspiring Outcomes

As Archbishop Desmond Tutu wisely stated, "There comes a point where we need to stop just pulling people out of the river. We need to go Upstream and find out why they're falling in." Our Upstream Intervention approach engages families in a healing journey, leading to **profound and compelling results**. Our qualified and compassionate service providers facilitate transformative Domestic Violence (DV) and family programs, effectively breaking the generational cycle through a blend of Upstream guidance and early Downstream intervention.

Elevate with Transformation

Looking ahead, our mission **extends beyond the ordinary**. We actively initiate meaningful dialogues and champion comprehensive, community-centred strategies to uplift societies at large. We are staunch believers in the power of the horse. We also understand that HWYP needs to strive for sustainability and expansion, through co-promotional marketing endeavours and sponsorship ventures with visionary brands. These like-minded partnerships will empower us to achieve MORE, reach MORE, and realize a shared dream. In today's philanthropic and ESG landscape, we are looking to attract corporations currently embracing socio-economic upliftment, and willing to help us pave the road to lasting progress and humanity. Unite for Progress: Early intervention is the cornerstone of TODAY, cultivating the foundation of thriving communities for TOMORROW. Join HWYP in shaping a brighter, harmonious future for all.

Course

THE COST

Raising Awareness

Sharing relevant data and insights about the financial impact and **benefits of investing** in mental health programs, intervention initiatives, and early prevention strategies – is critical as we engage with our community to make our youth a top priority.

Annual Cost

Queensland Health's budget for 2022-23 is placing \$1.6 billion toward Better Care Together: a Queensland state-funded mental health AODS strategy to alleviate pressure on the acute mental health system; improve community-based services; and support patients experiencing a mental health crisis. This is welcoming news as the children and young people who head into the Youth Justice system generally come from tough and often traumatic family backgrounds and many have problems that affect their behaviours and decisions. These pie charts are the taxpayers annual cost per youth. [**sources linked*]. Ultimately, it doesn't matter who supports the building of more detention centres; the stats on efficacy in reducing youth crime, are clear. More punishment does not work; in fact, it generally does the opposite. By prioritising and reallocating resources from detention centre builds - to **early intervention community-centred services**, we can provide essential support and guidance to youth and families before issues escalate.

Collaborate and Connect

Investing in early intervention isn't just a matter of ethics – it's a smart financial choice. By pooling our efforts and resources, we have the power to establish a system that's both economically efficient and deeply empathetic.

HWYP works – it is...
Proven from the past
Effective in the present
Provides hope for the future
